How to Improve the Security of Your WordPress Website

Protection	→	Detection	→	Recovery

Protection - keeping problems from happening

1. *The Network*
   1. Use a firewall - https://sucuri.net
2. *Your Server*
   1. Use a trusted host
3. *Your Application*
   1. Keep updated
   2. Follow best practices - http://ithemes.com/security
4. *Your Computer*
   1. Use a VPN
      1. Easy - http://getcloak.com
      2. Advanced - http://cfw.bz/TorGuard

Detection - determining something has gone wrong

1. Watch for anything abnormal
2. Audit activity

Recovery - fixing the problem

1. Keep a good backup - https://vaultpress.com
2. Know who to call - https://sucuri.net
